SCALE 1:1

- * Thickness of bracket acc. statical requirements
- ** Structural lower limit

Notes for steel structure:

- welding seam steel structure and steel bracket as HV-seam (no collision with base extrusion)!
- zinc bumps have to be removed, at all edges and drills of the steel structure in contact with the clamping system!
- to guarantee a sufficient contact pressure between sealing rubber and gutter, the vertical gutter plate has to be fabricated even and without any offsets!
